

innovative cable solutions

Meeting the Changing needs of a Modern Cable Market

ICS-2 Limited was formed in 2002. We are a well established European based Cable Manufacturer. We service the needs of what has become a continually evolving technology sector.

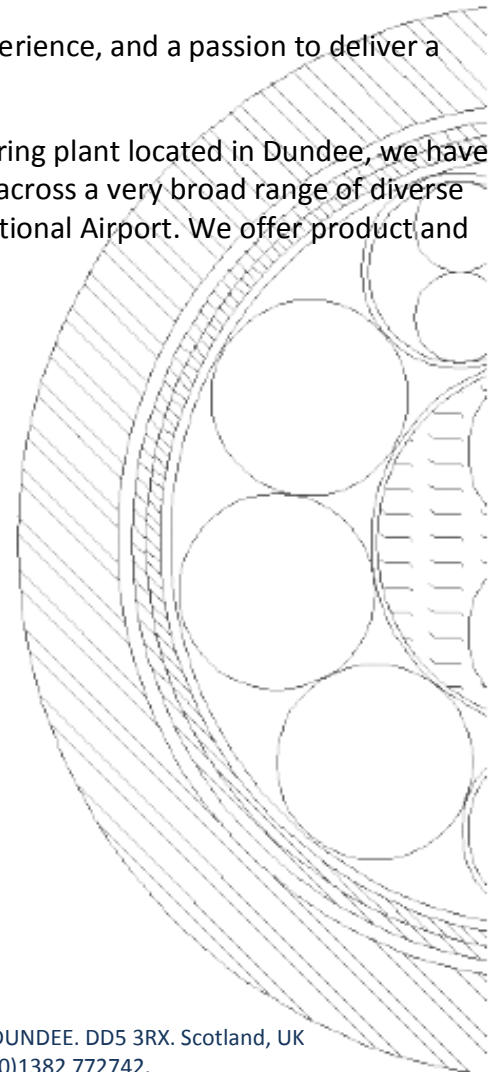

We offer *Custom, Standard, Quick turn, Prototype and Mixed technology Cable* as well as high volume types, all manufactured locally from our UK base.

The foundations of our business are built on a wealth of industry experience, and a passion to deliver a product and service capability which exceeds customer expectation.

Now operating from a second, larger and more advanced manufacturing plant located in Dundee, we have process capability to provide cost effective, quality cabling solutions across a very broad range of diverse product sectors. Our facility is one hour North of Edinburgh's International Airport. We offer product and designs covering the following industrial sectors: -

- **Motion Control and Robotics**
- **Motor Drive (static and hi-flex)**
- **Ethernet (Flexible and Static)**
- **General Industrial, Oil and Gas**
- **Medical (antimicrobial jacketing compounds)**
- **Broadcast (Interior and exterior types)**
- **Home Automation**
- **Buried Cable (signalling and roadside specialist)**
- **Railways (Signalling and Communications)**
- **Telecoms and Computing**
- **Mixed Copper and Fibre Capability**

innovative cable solutions

Innovation is key at ICS-2 Limited. We manufacture both standard and custom cable constructions. As technology and new ideas evolve ICS-2 applies knowledge gained from many years of experience to offer the correct electrical and materials solution. We offer *Custom, Standard, Quick turn, Prototype and Mixed technology Cable* as well as high volume types, all manufactured locally from our UK base.

Our Markets

Our philosophy has evolved from listening to customers and shaping our company to deliver their needs by working in partnership. We offer to: -

- **Eliminate waste in the supply chain**
- **Reduce the overall installed cost**
- **Optimise life cycle cost**
- **Converge market technologies**
- **Offer solutions to eliminate demanding challenges**

We manufacture for both OEM's and VAR's.

Interconnect, Preparation for Assembly:

Traditionally customers receive their product as bulk lengths then spend additional time and money converting the cable into the end product by further processing.

- **At iCs2 we can eliminate this cost by providing a pre-cut service.**
This service is available on both standard and custom cable types

We manufacture a vast range of cable products across several different family groups, all made to industry standards with exceptional quality and consistency.

In addition to standard cables we also provide a custom cable service.

PRODUCT GROUPS

- **Custom Constructions (Mixed Technologies)**
- **Co-Axial Cables**
- **Multi-Pair Cables**
- **Standard Cables**
- **Twisted Pair Cables**
- **Manufacturers equivalents**
(See our 'Standard Cable Types Flier')
